REMARKS

The applicant thanks the Examiner for the allowance of the present application, and offers the following comments for entry into the record. The reasons for allowance appear to maintain that the Ross et al. reference discloses certain freestanding features recited in some the claims -- instead it appears this reference has been solely overcome on the basis of the declaration. To the extent such is the case, the applicant respectfully reiterates that the Ross et al. reference lacks such features as further explained in the prior office action responses. In addition to the points set forth in the reasons for allowance, the claims are patentable over the art of record for various other reasons as explained in the prior office action responses, but are not repeated here for the sake of brevity.

Respectfully Submitted,
